To whom it may concern,

I wish to register my objection to the building of 90 houses on the site EM08a (Horsefield)

The site EM08a is within a National landscape and the exceptional circumstances required by the National Planning Policy have not been demonstrated.

I would like to see EM08a removed from the site allocation.

Also to remove the phrase "sites then where allocated within this local plan or" from Policy 30.

Havant Borough Council have a duty to protect and enhance the National landscape within Chichester Harbour.

This proposed development does not

enhance this, merely sets a precedent for further building and erosion of this beautiful landscape.

As a nation / world we are facing challenges with climate change, floods and draught becoming more frequent and difficult to deal with. We need to preserve and protect our natural world, ensure a healthy habitat for flora and fauna, not build houses on such land.

I would like for this development not to go ahead and would urge re-consideration in this matter.

yours sincerely,

[redacted]
