Dear Sir / Madam,

Re: Land Between A27 Havant Bypass & Selangor Avenue, Emsworth.

SGN acknowledges receipt of your notice of your intention to carry out work at the above location.

We enclose an extract from our mains records in the location of the area covered by your proposals together with a comprehensive list of precautions for your guidance. This plan shows only those pipes owned by SGN in its role as a Licensed Gas Transporter (GT). Gas pipes owned by other GT's and also privately owned may be present in this area. Information with regard to such pipes should be obtained from the owners. The information shown on this plan is given without obligation, or warranty, the accuracy thereof cannot be guaranteed. Service pipes, valves, siphons, stub connections, etc., are not shown but their presence should be anticipated. Your attention is drawn to the information and disclaimer on these plans. The information included on the enclosed plan should not be referred to beyond a period of 28 days from the date of issue.

There is High Pressure apparatus in the vicinity, accordingly a copy of your correspondence has been forwarded to the responsible engineer for the section, who will forward a separate reply in due course. It essential that no works or crossings of this high pressure pipeline are carried out until detailed consultation has taken place.

Safe digging practices, in accordance with HSE publication HSG47 "Avoiding Danger from Underground Services", must be used to verify and establish the actual position of mains, pipes, services and other apparatus on site before any mechanical plant is used. It is your responsibility to ensure that this information is provided to all persons (either direct labour or contractors) working for you on or near gas apparatus. In addition please follow the advice given on the gas safety card.

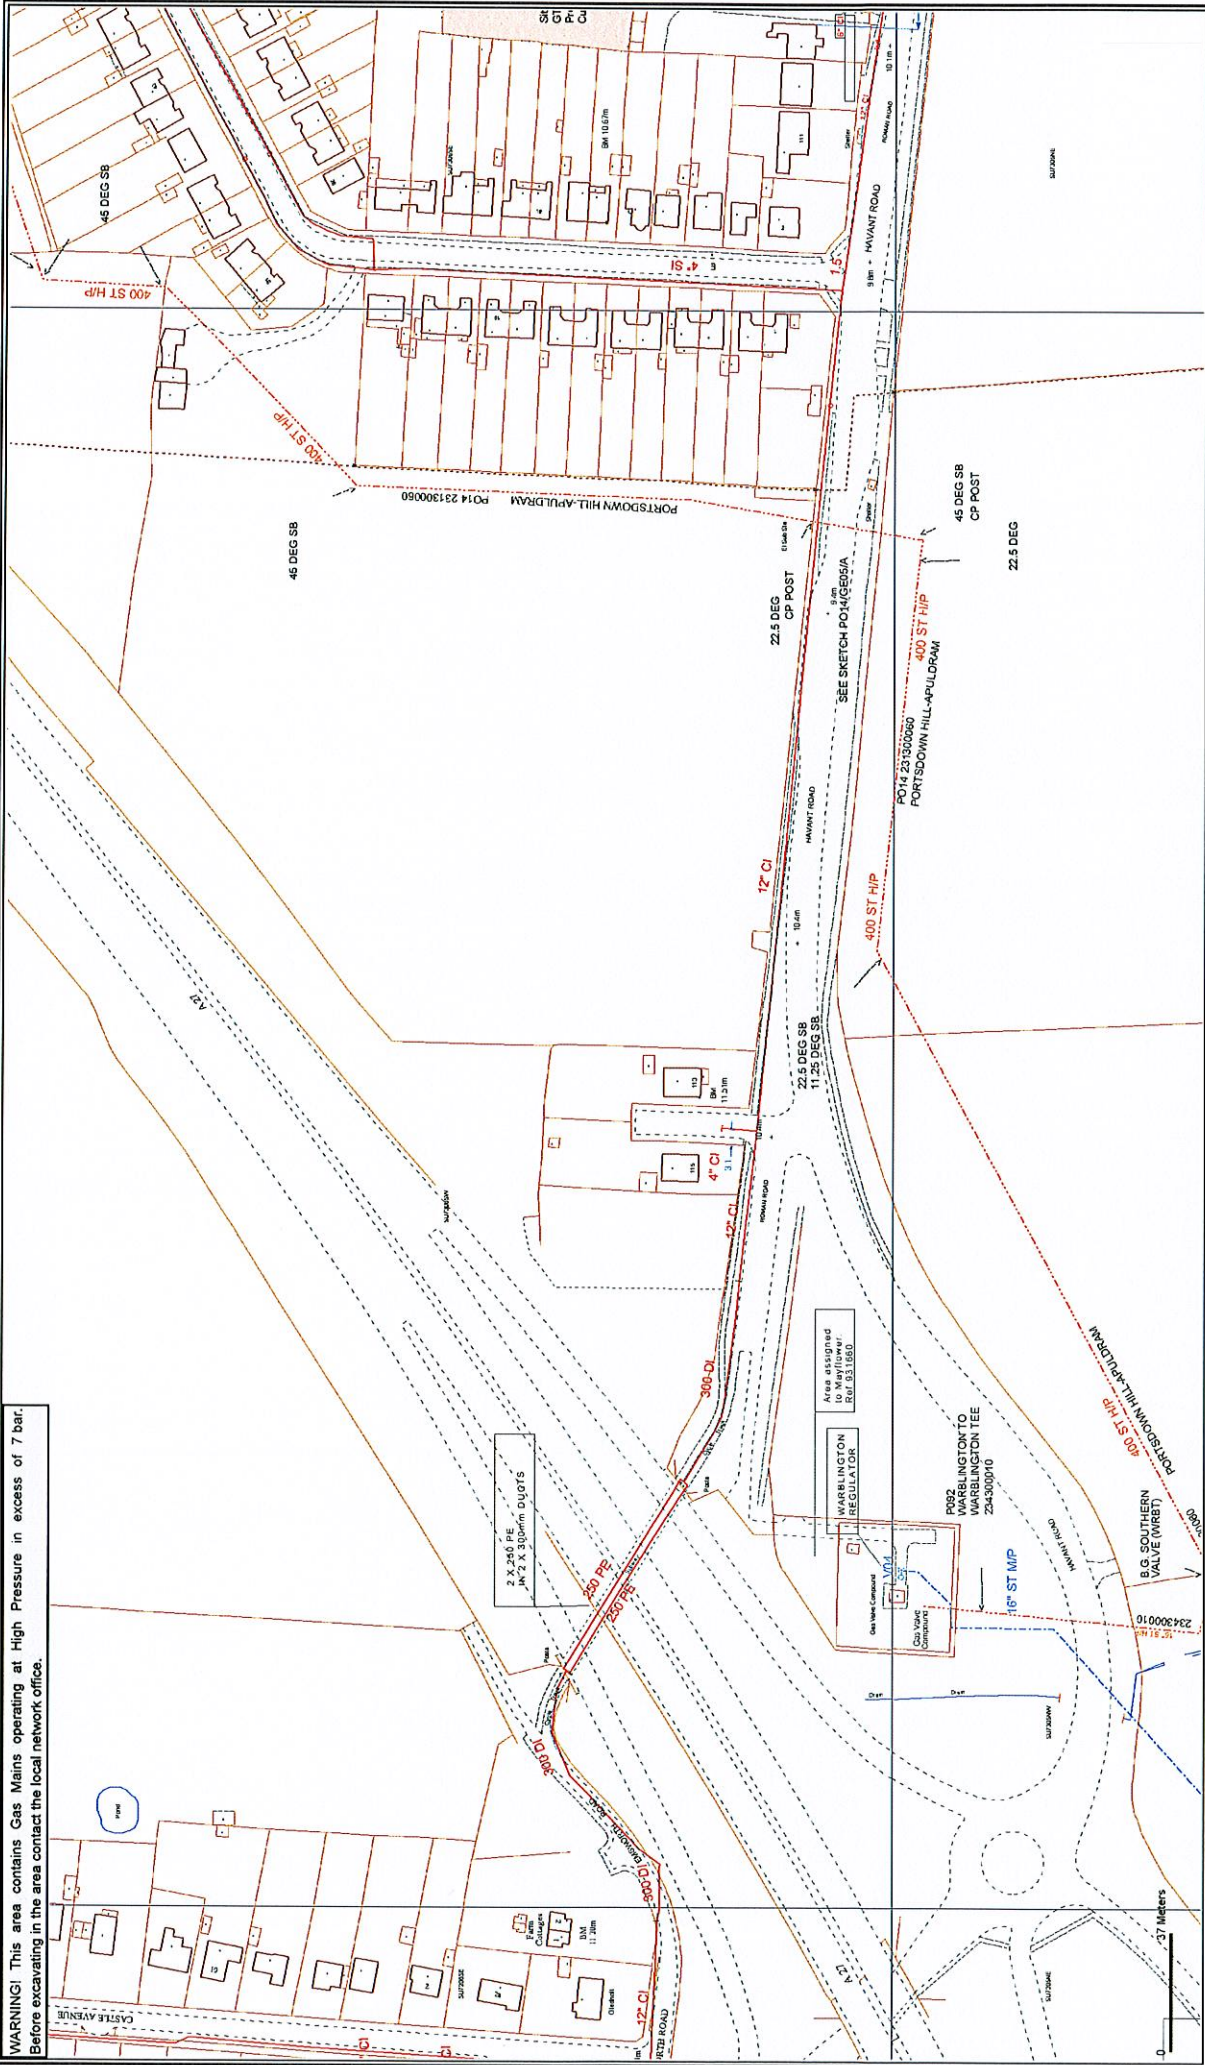

It must be stressed that both direct and consequential damage to gas plant can be dangerous both for your employees and the general public, repairs to any such damage will incur a charge. Your works should be carried out in such a manner that we are able to gain access to our apparatus throughout the duration of your operation.

Please contact SGN prior to your intended start date.

Should you require any further assistance before starting any works please contact the telephone number below
Yours faithfully,

Lorna Urquhart
Admin Assistant

WARNING! This area contains Gas Mains operating at High Pressure in excess of 7 bar.
Before excavating in the area contact the local network office.

This plan shows the location of these pipes owned by Scotia Gas Networks ("SGN") by virtue of being a licensed Gas Transporter (GT). Gas pipes owned by other GTs, or third parties, may also be present in this area and are not shown on this plan. Information with regard to such pipes, valves, siphons, sub-connections, etc. are not shown but their presence should be anticipated. The accuracy of the information shown on this plan, in respect to such pipes, valves, siphons, sub-connections, etc. are not shown but their presence should be anticipated. No liability, in any whatsoever is accepted by SGN or its agents, servants or sub-contractors for any error or omission contained herein. Safe digging practices, in accordance with HS(G47), must be used to verify and establish the actual position of mains, pipes, services and other apparatus on site before any mechanical plant is used. It is your responsibility to ensure that this information is provided to all persons (whether direct labour or sub-contractors) working for you on or near gas apparatus. The information included on this plan should not be referred to beyond a period of 28 days from the date of issue.
