

**TOWNSCAPE, LANDSCAPE AND SEASCAPE CHARACTER
ASSESSMENT OF HAVANT BOROUGH**

Appendix B: Ecological Report

Ecological Analysis

The data tables on the following pages provide information on the distribution of habitats and of sites designated for their nature conservation value, across Havant Borough. This information provides additional detail to the descriptive data contained within the main body of this study. The analysis has summarised the data for each landscape character types and areas, providing information on the key habitats and designated sites in each division of the landscape.

Accuracy of data

The Landscape Character Assessment was digitised on-screen over OS MasterMap. The nature conservation datasets were digitised at various scales over different map bases therefore lines do not always match. It is also important to stress that for the purposes of this ecological analysis it was necessary to treat LCA boundaries as sharp boundaries. In reality many LCA boundaries will be a broad zone of transition.

Care should be taken in the interpretation of the results. In particular habitat types that occur only rarely within an LCA may be more strongly associated with an adjoining LCA. Similarly protected sites that only just extend into an area may lie principally in an adjoining area. As a precautionary measure, these protected sites have been included in both LCAs, because management of either LCA could potentially impact upon the quality of the designated site.

Habitat & Land Use Analysis

In order to gain an insight into the distribution of habitats across the landscapes of the Borough, the Habitat and Landuse dataset, supplied by Hampshire County Council, was analysed. To reduce the number of categories in the Habitat and Landuse dataset, habitat polygons were grouped into Priority Habitats, as shown in Table 1.

The Priority Habitat data was intersected with the landscape character areas using ESRI ArcGIS. Summary statistics were then calculated for each landscape character area, showing the area of each Priority Habitat and the percentage of the LCT that it covers. In order to permit comparison between LCTs the percentage cover of Priority Habitats within each Landscape Character Type was also calculated.

Designated Sites Analysis

Analysis of the distribution of designated sites was carried out within a Geographical Information System, in order to identify the sites present within each Landscape Character Area. The following designations were considered:

SINC

A Site of Interest for Nature Conservation is land which is considered to be of particular importance for nature conservation within Hampshire. All sites are

assessed against detailed criteria developed by Hampshire County Council, English Nature and Hampshire & Isle of Wight Wildlife Trust.

SSSI

A Site of Special Scientific Interest (SSSI) is the land notified as an SSSI under the Wildlife and Countryside Act (1981), as amended. Sites notified under the 1949 Act only are not included in the Data set.

SAC

A Special Area of Conservation (SAC) is the land designated under Directive 92/43/EEC on the Conservation of Natural Habitats and of Wild Fauna and Flora.

SPA

A Special Protection Area (SPA) is the land classified under Directive 79/409 on the Conservation of Wild Birds. Ramsar A "Ramsar site" is the land listed as a Wetland of International Importance under the Convention on Wetlands of International Importance Especially as Waterfowl Habitat (the Ramsar Convention) 1973.

BAP Priority Habitat	HCC Habitat Code*
Lowland Mixed Deciduous woodland (includes Lowland Beech & Yew woodland)	W1, W2, W3, W4
Ancient Hedgerows	
Lowland Wood-pasture & Parkland	ST3, ST31, ST32
Cereal Field Margins	
Lowland Meadows & Rush Pasture	GL12, GL5
Lowland Calcareous grassland	GL21, GL22
Coastal grazing marsh	GL6
Floodplain grazing marsh	GL1, , GL12, GL13, GL3, GL5, AQ2, AQ3, AQ4
Lowland heathland & Lowland Dry Acid Grassland	HL1, HL2, HL3, GL11, AQ1
Fens and Reedbeds	AQ2, AQ3, AQ4
Eutrophic standing water	AQ5, AQ6
Coastal Saltmarsh	SS4, SS3
Coastal Sand Dune	SS6, SS7
Coastal Vegetated Shingle	SS5
Maritime Cliff & Slopes	SS8
Mudflats	SS1
Saline Lagoons	AQ8
