

Urban Extension Sites and Areas Considered Unsuitable

Site ref	Site Name	Source of Information	Description and reason for exclusion
Havant			
UE1	Langstone Lodge	Promoted to the council	Site located in flood zone 2, predicted to zone 3 in 2115 and high landscape sensitivity
UE2a	Land north of A27	Promoted to the council	Site would detrimentally affect the strategic gap at its narrowest point
UE2b	Land South of A27	Promoted to the council	Site affected by gas pipeline and would detrimentally affect the strategic gap at its narrowest point.
UE3a	Land to north of Bartons Road (area)	Promoted to the council	Part of the area promoted to the Council has been considered suitable for possible housing development but the remaining area is not because of the impact it would have on the strategic gap.
UE3b	Land to south of Bartons Road (area)	Promoted to the council	Part of the area promoted to the Council has been considered suitable for possible housing development but the remaining area is not because of the impact it would have on the strategic gap.
UE5	Land at Portsdown Hill (Area)	Promoted to the council	Part of the area promoted to the Council has been considered suitable for possible housing development but the remaining area is not because of the impact it would have on the strategic gap.
UE6b	Land north of Leigh Park	Site survey	Site immediately south of the proposed Havant Thicket Reservoir
UE8	Hazleton Wood	Promoted to the council – 2007 SHLAA	A survey undertaken by Hampshire Biodiversity Information Centre has highlighted that the site is of SINCC quality. This together with the presence of a Woodland Protection Order on the site and lack of clear
