Land Parcel:	7ii.l
County Landscape character area (HCC):	Forest of Bere East (2f) (LCT Lowland Mosaic Medium Scale)
District Landscape character area / landscape type:	LCA7i Purbrook Heath / LCTB Lowland Settled Wooded Farmland
Presence in Chichester AONB	No
Undeveloped Gap (ref Policy AL2)	Yes
Date of area survey:	14.10.14
Surveyors:	AG
Weather/visibility:	Overcast

General visibility	Population	Mitigation potential
Views into the area from: Glimpses of southern part from A3 (T) and adjacent houses, northern part visible from Purbrook Heath Road and Wayfarers Walk to north western edge, northern part of parcel used for various recreational activities	Types of viewers: Walkers, residents, motorists	Opportunities for mitigation Strong vegetation structure
Views out of the area to: From north part of site the rising ground to the south can be glimpsed	Magnitude of viewers (level of use and popularity): Busy roads and several houses, but glimpsed views, regional footpath	Landscape impact and compatibility of mitigation: Compatible with landscape character
Does the area form part of a skyline? No	Visual perceptions (activity and expectations of local visual receptors): Northern part of parcel used for leisure pursuits	Green Infrastructure links: Streams through parcel, bike path along A3 (T), north west of parcel allocated as a Local Green Space
Panoramic views:

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Purbrook to east – Victorian, Edwardian residential and modern estates

Character of the urban edge:

Screened from within parcel by strong hedgerow along the west side of the A3 (T)

Relationship with adjacent settlement:

Purbrook to eastern and southern edges

Character of the wider landscape:

Continuation of the lowland mosaic to the north, west, and south west, with the open Portsdown ridge further to the south

Relationship with adjacent wider countryside:

Links with countryside to the south and west

Contribution to the gap between settlements:
Sits to the side of rather than between settlements, but forms rural setting to edge of Purbrook
Historic links with the wider area if known:
None known
Ecological links with the wider area if known:
Vider countryside to west
Recreational links with the wider area:
Wayfarer's Walk

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Cowplain – post-war detached housing in residential streets

Character of the urban edge:

Fairly soft with trees in back gardens and vegetation within area screening views in

Relationship with adjacent settlement:

Adjacent to Waterlooville/Cowplain to the south and west

Character of the wider landscape:

Gently sloping open areas with some tree cover and tree belts continues to the north and east, large area of mixed woodland (Area 10.1) to the southeast

Relationship with adjacent wider countryside:

Directly linked to the remainder of the golf course and Hazleton Common Nature Reserve to the north

Separated from Bell's Copse (Area 10.1) woodland, open area of land forming Area 10.2, Blendworth common and countryside beyond (including the South Downs National Park) by the A3(M). The area is not considered part of the setting of the SDNP as there is no physical or visual link.

Contribution to the gap between settlements:

Forms part of rural edge of Waterlooville/Cowplain and part of open gap between Cowplain and Leigh Park/Rowlands Castle

Historic links with the wider area if known: None known

Ecological links with the wider area if known:

Nature reserve to north and wider countryside to east over A3(M)

Recreational links with the wider area:

Bridleway along Sheepwash Road joins Monarchs way, a regional long distance trail approximately 1km to the north of the area, after passing through Hazleton Common Nature Reserve

VDS/Parish Plan – relevant extracts:

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Post-war housing and flats in the north part of Leigh Park. Detached post war houses in Waterlooville/Cowplain across A3

Character of the urban edge:

North edge of Leigh Park is raw in places, Dunsbury Hill Wood provides some enclosure to the northern edge. Cowplain / Waterlooville screened by A3 corridor planting

Relationship with adjacent settlement:

Separated from Leigh Park by Bell's Copse and Dunsbury Hill Wood Separated by A3(M) and Waterlooville Golf Course (Area 9.1)

Character of the wider landscape: Continued gently undulating grassland to north without individual trees and more intensely managed Woodland to east and south (area 10.2) Golf course (area 9.1) to west

Relationship with adjacent wider countryside:

Separated from 9.1 to the west by A3(M) otherwise an important part of the woodland / grassland pattern of landscape to north, east and south

Contribution to the gap between settlements:

Forms part of large gap between Havant/Rowlands Castle and Waterlooville/Cowplain although this will be reduced by the proposed Dunsbury Hill Farm development to the south west

Historic links with the wider area if known:

None known

Ecological links with the wider area if known: None known

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:
Separated from Waterlooville by A3 (M)
Waterlooville (LCA8) : late 20 th C housing development
Leigh Park (LCA16) to the south-east – 60s and 70s residential including blocks of flats
Character of the urban edge:
Wooded edge to Waterlooville and planting along A3 (M) gives a strong wooded edge to the settlement with views of houses within this wooded setting
Wooded links into Leigh Park. Vegetation along boundary with Calshot Road
Relationship with adjacent settlement:
Well separated from Waterlooville by wooded belt
Mainly disconnected from Leigh Park but with the build-out of the development site to the south the area will wrap around the settlement edge
Character of the wider landscape:
Mainly woodland with pockets of open grassland
Separated from Blendworth Common and Staunton Country Park by extensive woodland at Bell's Copse
Relationship with adjacent wider countryside:
With the allocation of the land to the south for development, the landscape character of this area is now isolated from the wider landscape by the development and
settlement, although the wooded eastern part has strong links with the wider wooded landscape to the north and east
Contribution to the gap between settlements:
With the proposed development to the south, the area separates Waterlooville from this new development area in a narrow gap of 300m
Historic links with the wider area if known:
No significant connections known
Ecological links with the wider area if known:
Woodland is part of a series of interlinked SINCs
Recreational links with the wider area:
No significant links

STUDY INTO THE LANDSCAPE SENSITIVITY AND CAPACITY AND THE VALUE OF THE UNDEVELOPED OPEN LAND IN HAVANT BOROUGH 2015 RECORD SHEET: LAND PARCEL 11.2

Adjacent settlement character and pattern: 1edium to large modern estates to the west (Waterlooville LCA 5 and 8) and east (Leigh Park LCA 15 and 16)	
Character of the urban edge:	
ree lined and well screened edge to Waterlooville (LCA 5 and 8). The wooded landscape extends into the urban fabric	
Open landscapes including recreation areas within LCAII.2 contribute to character of the urban edge at Leigh Park (LCAI6). More exposed edge to Ramsc	dale Road
evelopment. More wooded edge to LCA15	
Relationship with adjacent settlement:	
eparated from Waterlooville by the A3 and its boundary tree cover	
trong contrast with urban form of Leigh Park	
lecreational value to Leigh Park	
Vill be bounded in the north by the proposed Dunsbury Hill Farm development	
Character of the wider landscape:	
Voodland and open grassland continues to the north and south within LCAII	
Relationship with adjacent wider countryside:	
No visual connection with LCAs 9, 10, 12 or 20	
art of the extensive woodland and open grassland landscape covering LCAs 9, 10, 11 and 20	
Contribution to the gap between settlements:	
Varrow gap at this point between Leigh Park and Waterlooville which is been further reduced by the proposed Dunsbury Hill Farm development north-east	t of the are
leville's Park has a notable sense of seclusion from the adjacent urban areas and the A3	
listoric links with the wider area if known:	
Contributes to a landscape of pre 1810 assarted woodland which survives as part of the Forest of Bere	
cological links with the wider area if known:	
he many SINCs in the area contribute to the matrix of SINCs between Waterlooville and Leigh Park	
Recreational links with the wider area:	
he informal 'country park' area at Neville's Park is rather isolated from other facilities and PRoW connections	
/DS/Parish Plan – relevant extracts:	
V/A	

Land Parcel:	11.3 Land east of Crookhorn
County Landscape character area (HCC):	Forest of Bere East
District Landscape character area / landscape type:	LCAII A3 (M) Eastern Corridor/ LCTB Lowland Settled Wooded Farmland
Presence in Chichester AONB	No
Undeveloped Gap (ref Policy AL2)	Leigh Park – Waterlooville

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

To the west urban edge defined by college and school buildings and their grounds with some modern housing as part of an urban area of mixed character (LCA5 and LCA6)

To the east two large superstores on the edge of Leigh Park and with a well defined edge to the modern housing within LCA15 (Leigh Park)

Character of the urban edge:

Well demarcated by mature tree lines

Relationship with adjacent settlement:
West of A3 (M) the area form the setting to the colleges and schools forming a buffer to the highway
The open land south of Scratchface Lane is orientated eastwards and there is no intervisibility with Crookhorn
Littlepark Wood relates to Leigh Park to the east and is enclosed on 3 sides by built form with a just a small boundary along the south side to open land
Character of the wider landscape:
Wooded landscape continues east of the A3 (M) to the north
Open rolling grassland continues south of the area into LCA12
Relationship with adjacent wider countryside:
Good visual connectivity with wooded landscape to the north – severed physically by the A3 (M)
Open rolling landscape extends into LCA12 to the south
Contribution to the gap between settlements:
The area lies in a narrow gap between Leigh Park and Waterlooville which is already affected by the two superstores and extensive major highway infrastructure. The
woodland cover is important in maintaining the perception of a gap between the two settlements. The open land south of Scratchface Lane provides physical separation
but at this point both Crookhorn and Leigh Park are well screened by tree cover.
Historic links with the wider area if known:
Part of series of pre 1810 assarted woodland along the undeveloped A3 (M) landscape corridor
Ecological links with the wider area if known:
Part of a series of wooded SINCs along the undeveloped A3 (M) landscape corridor
Recreational links with the wider area:
None

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Widley to north west, Crookhorn to north east - suburban streets and cul-de-sacs of detached post war housing

Character of the urban edge:

Back gardens of detached post war housing and school buildings largely screened by woodland and tree clumps on the golf course and tree belt along north side of College Road

Relationship with adjacent settlement:

Contained by Farlington and Drayton to the south and Widley and Crookhorn to the north

Character of the wider landscape:

Rough horse grazing pasture with scattered tree clumps and mature hedgerows across areas 12.2 and 12.3 to east and LCAII to north east

More undulating in 12.2 and sloping up to the continuation of the ridge in 12.3

Relationship with adjacent wider countryside:

Connected to rough pasture in 12.2, 12.3 and LCA 11 as well as the strip of scrub and rough grass to south of fort

Separated from larger area of downland scrub and rough grass to south by Portsdown Hill Road and largely disconnected from wider landscape by settlement and transport corridors

Contribution to the gap between settlements:

Makes up a large part of the open area between Farlington/Drayton to south of ridge and Widley and Crookhorn to north of ridge and eastern area forms part of open space between Havant / Bedhampton and Purbrook. Western part forms setting of Fort Purbrook.

Historic links with the wider area if known:

Fort and ridge are connected to areas naval and military history

Ecological links with the wider area if known:

None known

Recreational links with the wider area:

Wayfarers Walk stretches from the coast to close to Newbury

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Isolated from nearby settlements. Houses at Camp Down to south east (separated by parcel 12.3); Crookhorn to north west beyond 12.1 – suburban streets and culde-sacs of detached post war housing

Character of the urban edge:

Eastern edge of Crookhorn is strongly vegetated. Houses at Camp Down (including the Tower) are partly screened by vegetation, but partly open. Separated from A3(M) to the east by thin area of scrub and small trees

Relationship with adjacent settlement:

Separated by 12.1 (golf course) from Crookhorn; separated by A3(M) from Bedhampton and by ridge of Camp Down from residential areas to the south

Character of the wider landscape:

Undulating horse grazed rough grassland continues to the north Higher grazed rough grassland to the south in area 12.3 Golf course in area 12.1 to west

Relationship with adjacent wider countryside:

Linked to landscape to north, west and south - similar character with fewer hedgerow divisions to north and south separated from the area by low hedges

Contribution to the gap between settlements: Forms a significant section of the gap between Havant/Bedhampton and Crookhorn

Historic links with the wider area if known:

Historic character type continues to north

Ecological links with the wider area if known: None known

Recreational links with the wider area: No

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern: Large detached houses to south east Camp Down and western edge of Bedhampton (split from Bedhampton by the A3) To the south west there are post war houses and waterworks south of Portsdown Hill road (part of Farlington)

Character of the urban edge:

Large driveways and front gardens separated from site by large hedge and Portsdown Hill Road

Relationship with adjacent settlement:

South east boundary with detached houses partly open, partly vegetated; houses south of Portsdown Hill Road separated by hedge to north side

Character of the wider landscape:

Area 12.2 to north similar but more enclosed while 12.1 is dominated by the golf course and fort but maintains a similar landform. The A3(M) is directly east

Relationship with adjacent wider countryside:

Strongly linked to and overlooks area 12.2 to the north and 12.1 to the west. Overlooks 12.4 to the south although separated from it by Portsdown Hill Road and large houses south of the road.

Contribution to the gap between settlements:

Forms the southeast corner of the undeveloped gap between Bedhampton/Farligton to the south and Crookhorn to the north and part of the narrow gap between Bedhampton and Farlington

Historic links with the wider area if known:

None known

Ecological links with the wider area if known:

None known

Recreational links with the wider area:

Wayfarers Walk which runs from the coast to Newbury passes adjacent to the site on Portsdown Hill Road.

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:
ost war detached houses of Farlington to west and Bedhampton to east (separated by open field allocated for development)
Character of the urban edge:
Harsh – limited vegetation
Relationship with adjacent settlement:
Overlooking and adjacent to housing to the southwest and land allocated for development to the east
Character of the wider landscape:
Residential and urban greenfield areas with the coast beyond to the south
Area 12.3 to the north
Relationship with adjacent wider countryside:
eparated from area 12.3 by Portsdown Hill Road; some link with LCA 41 (Forty Acre Farm) to south of Havant Road. Together with Forty Acre Farm and Camp
Down to north the area forms an open, green corridor to the coast
Contribution to the gap between settlements:
orms the narrow gap between Bedhampton and Farlington.
Historic links with the wider area if known:

No

Ecological links with the wider area if known: None known

Recreational links with the wider area: No

VDS/Parish Plan – relevant extracts:

LANDSCAPE SENSITIVITY

Natural factors	Cultural factors	Perceptual features
Topography and landform including highest and lowest contours : Flat and low-lying, largely between the 5m and 10m contours, extending just below the 5m contour to the south and east. Embankment to A27 and A3 to south and west	Boundary features other than vegetation: Post and rail fence to Lower Road	Tranquillity – Noise levels: Sporadic noise from passing trains. Traffic noise from A3/A27 in west of area. More quiet towards historic core of Old Bedhampton
Geological features: None	Contribution of private gardens to landscape character: Gardens of Conservation Area, including mature trees, provide soft edge to north-east corner	Tranquillity – Visual intrusion / detractors: Overhead lines A27 Railway
Soil quality: Grade I	Parkland features: None apparent	Tranquillity – Light pollution/dark skies: Road and train headlights
Water features: None	Conservation Area: Adjacent to and important to the setting of Old Bedhampton Conservation Area to east	Accessibility to area by public footpath: No. PROW to eastern boundary
Landcover and land use: Arable, ruderal grassland, railway	Landscape features of CA: Mature trees, listed buildings, brick walls and bridge over railway line, views	PROW links including promoted routes and national trails: No

Natural factors	Cultural factors	Perceptual features
Tree belts, individual trees and riverside trees: Trees to A3/A27/railway corridors. Internal tree belt. Small tree group within centre of north-eastern field.	Setting of listed buildings: Within Conservation area. Old Mill House is approx. 90m to east of eastern boundary	Recreational areas: No
Hedgerows and hedgerow trees: Thick vegetation to A27. Some internal boundaries. Hedge with trees to Lower Road	Scheduled Ancient Monuments: None	Aesthetic sensitivity - Elements of openness/enclosure: Fairly enclosed to south and west, more open to north and east
Woodland and copses: No	Historic landscape (HLC): 1.10 Medium regular fields with straight boundaries (Parliamentary type)	Aesthetic sensitivity – landscape pattern: Medium scale, simple, irregular
Wetland and meadow: No	Cultural associations: Old Bedhampton Conservation area has associations with the Duke of Wellington. Old Mill House has associations with Keats.	Open access areas: No
Common land: No	Features of cultural importance: None	
Heathland: No	Built form in area: Sheds to north-west and south-east	
Other significant vegetation cover: None		
BAP/Phase I records: Adjacent to coastal and flood plain grazing meadow		
Presence of SSSI/SINC/local wildlife designation/Semi-Natural Ancient Woodland: No SSSI or SINC		
Presence in a floodplain:		

Natural factors	Cultural factors	Perceptual features
Small area of Zone 2 and 3 to east of area along route		
of Hermitage Stream		
Sensitivity score:	Sensitivity score:	Sensitivity score:

Landscape sensitivity score:		
Medium		

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Dispersed settlement to Old Bedhampton Conservation area of older detached buildings within substantial plots. Modern extension along Lower Road.

Character of the urban edge:

Moderately soft and well-vegetated. Hedges and trees filter the edge to north.

Relationship with adjacent settlement:

North part is well-connected with Old Bedhampton and the Conservation Area and forms an important part of its rural setting, though the edge of settlement is fairly well vegetated. South of the railway the area is remote from the settlement. The parcel as a whole forms an important buffer between the settlement and the A27.

Character of the wider landscape:

Urban settlement to the north, Conservation Area with industrial and residential beyond to the east. A27 acts as a barrier to the south as does A3 to the west.

Relationship with adjacent wider countryside:

Parcel has links with vestigial countryside to east

Cut off from wider countryside due to major roads to south and west.

Contribution to the gap between settlements:

More important as a setting for Old Bedhampton as the area is not directly between Bedhampton and Farlington, it is not widely visible generally and only from the train when travelling east to west between the settlements. The A3 corridor provides a physical and visual barrier between the settlements.

Historic links with the wider area if known:

None known

Ecological links with the wider area if known:

None known

Recreational links with the wider area:

PROW to east with limited links to wider network but somewhat isolated due to presence of railway and major roads on two sides. Southern part of parcel sandwiched between road and railway albeit with footpath to east leading to footbridge.

VDS/Parish Plan – relevant extracts:

Old Bedhampton Conservation Area- Character Appraisal 1994 HBC: 'Fine example of a Victorian brick railway bridge' to eastern boundary of parcel. 'The character of Old Bedhampton and its open undeveloped setting have remained remarkably intact'. Norman church. 'General character of the conservation area is of detached properties within substantial grounds'. Some modern buildings reflect the traditional building types, however some are 'less compatible'. Substantial number of significant trees. 'Still enjoys...an open undeveloped setting'. 'South of the railway line the open fields of Kingscroft Farm, adjoining the Hermitage Stream, provide the setting to the east of this part of the Conservation area'.

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Dispersed settlement to Old Bedhampton Conservation Area of older detached buildings within substantial plots. Modern extension along Lower Road.

Character of the urban edge:

Soft and well-vegetated.

Relationship with adjacent settlement:

Fairly well-connected with Old Bedhampton and the Conservation Area to north and east via Mill Lane. Eastern part of the parcel somewhat isolated from Old Bedhampton, closer to Marples Way industrial units

Character of the wider landscape:

Village/urban settlement and recreation ground to the north, grazing/water works with industrial and residential beyond to the east. A27 acts as a barrier to the south. Arable farmland and railway to west.

Relationship with adjacent wider countryside:

Fairly well-connected to remnant farmland to west and east.

Contribution to the gap between settlements:

Forms part of buffer between Bedhanpton and Brockhampton although this is breached by railway line and A27

Historic links with the wider area if known:

None known

Ecological links with the wider area if known: Hermitage Stream

Recreational links with the wider area:

PROW to west with limited links to wider network but somewhat isolated due to presence of railway and major roads. Wayfarers Walk and Solent Way pass through the parcel.

VDS/Parish Plan – relevant extracts:

Old Bedhampton Conservation Area- Character Appraisal 1994 HBC: 'Fine example of a Victorian brick railway bridge' to western boundary of parcel. 'The character of Old Bedhampton and its open undeveloped setting have remained remarkably intact'. Norman church. 'General character of the conservation area is of detached properties within substantial grounds'. Some modern buildings reflect the traditional building types, however some are 'less compatible'. Substantial number of significant trees. 'Still enjoys...an open undeveloped setting'. 'South of the railway line the open fields of Kingscroft Farm, adjoining the Hermitage Stream, provide the setting to the east of this part of the Conservation Area'.

Character of the urban edge:

Raw/open to southern boundary in parts

Relationship with adjacent settlement:

Contained on southern edge by Leigh Park

Character of the wider landscape:

Gently undulating open landscape with occasional tree belts and large areas of woodland

Relationship with adjacent wider countryside:

Stronger relationship to character of the rest of the Country park to the north/west

Physical and visual links to Deerslaughter Plain/Gammons Hill

Contribution to the gap between settlements:

Part of the gap between Havant and Rowlands Castle

Historic links with the wider area if known:

Parkland boundary extends to the north with a clear link provided by 'The Avenue' protruding to the north west

Thicket Lawn and High Lawn are areas of original parkland have been severed from the site of Sir George Staunton's house and associated buildings (to the south) by the construction of Middle Park Way road as discussed in the The Sir George Staunton Conservation Area Appraisal

Ecological links with the wider area if known:

Stream

Recreational links with the wider area:

Staunton Way regional long distance walking route

VDS/Parish Plan - relevant extracts:

The Sir George Staunton Conservation Area Appraisal refers to a 'fountain' which existed in High Lawn and is today surrounded by scrub.

The Appraisal also mentions that parkland tree clumps have been greatly diminished by aging trees, dutch elm disease and storm damage. Thicket Lawn and High Lawn are also described as areas of original parkland which have been severed from the site of Sir George Staunton's house and associated buildings (to the south) by the construction of Middle Park Way road.

Medium/High	Medium/High	Medium
Landscape sensitivity score:		
Medium / High		

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern: Post-war housing and industrial complex in the northern area of Leigh Park adjacent to southern edge/western edge and 60's and 70's housing adjacent to eastern edge.

Character of the urban edge:

Raw/open in parts

Relationship with adjacent settlement:

Contained on southern, eastern and western edge by Leigh Park

Character of the wider landscape:

Gently undulating open landscape with occasional tree belts and large areas of woodland

Relationship with adjacent wider countryside:

The parcel's historic associations and character gives it a strong relationship with the rest of the Country Park to the north. However, the parcel is severed from the wider parkland by Middle Park Way along its northern edge which means the built form within the parcel also feels associated with the urban edge of Leigh Park which bounds the parcel on three sides

Visual links Gammon's Hill, Deerslaughter Plain, High Lawn in LCA 20.2 and entrance to main controlled public access area of Country Park in LCA 20.1

Contribution to the gap between settlements:

Part of the gap between Havant and Rowlands Castle

Historic links with the wider area if known:

Historic parkland boundary extends to the north

Ecological links with the wider area if known:

Stream

Recreational links with the wider area:

Staunton Way regional long distance walking route

VDS/Parish Plan – relevant extracts:

The Conservation Area Appraisal mentions that Thicket Lawn and High Lawn to the north are areas of original parkland which have been severed from the site of Sir George Staunton's house and associated buildings (in the east of the parcel) by the construction of Middle Park Way road.

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:
Modern C20 th housing to the south in New Brighton (LCA23)
Radburn housing in north-west New Brighton
New housing estate under construction to the south at Hampshire Farm
Character of the urban edge:
Radburn housing buts up to Hollybank Wood
Tree lined Long Copse Lane separates New Brighton from the area
Housing is exposed but its rural setting gives it a semi-rural character
Long Copse Lane has a distinctive semirural character becoming distinctly rural east of Hollybank Farm
Relationship with adjacent settlement:
Good contrast with settlement to the south
Woodland provides important rural landscape setting to the Borough
Part of the open pastoral landscape within private grounds which separates New Brighton from Westbourne
Character of the wider landscape:
Open medium scale arable landscape to the east bounded by strong hedgerow pattern
Some small scale pasture along the River Ems
Wooded landscape continues to the north
Relationship with adjacent wider countryside:
Hollybank Wood is an integral part of the extensive woodland which continues as part of Southleigh Forest the north (part of the Forest of Bere)
Private grounds form a transition landscape between the woodland and open farmed landscape to the east
Use as paddocks continues into LCA21.4
Contribution to the gap between settlements:
Part of the open northern swathe of landscapes (open arable, parkland, woodland and pasture) which separate northern Leigh Park from New Brighton and Westbourne
The western part of LCA21.3 contributes to the mix of open grassland and arable fields which straddle the River Ems in the narrow gap between New Brighton and
Westbourne
Historic links with the wider area if known:
Hollybank House is part of a series of gentlemen's residences and isolated farmsteads along the ridge at 35m AOD although it no longer has views south to the harbour
Hollybank Farm, together with the former Hampshire Farm to the south, managed the farmland along the River Ems valley
Part of the surviving wider Forest of Bere
Ecological links with the wider area if known:
Hollybank Wood is part of the SINC extending over Southleigh Forest
Recreational links with the wider area:
Linear link via Sussex Border Path
Link into Local Green Space AL8 at Hampshire Farm to the south within LCA21.4

VDS/Parish Plan – relevant extracts: N/A

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:
To the east - New Brighton LCA 23: Sub-urban housing area including some Edwardian villa housing along Horndean Road. In filled with later post war housing. Lin
recent housing development
To the south - Emsworth -western suburbs LCA25: bounded by the railway line; incremental 19 th and 20 th century residential expansion of Emsworth
Character of the urban edge:
Tree cover, hedgerows and small fields filter the urban edge
Linear edge to south created by railway line
Relationship with adjacent settlement:
New Brighton extends into the western side of Horndean Road
Emsworth – western suburbs contained by railway line
Character of the wider landscape:
Very open arable landscape across land parcels 22.2.and 22.3
Relationship with adjacent wider countryside:
Level of both physical and visual connectivity between western part of land parcel 22.1 and southern part of land parcels 22.2 and 22.3
Divided from these two by strong line of trees to northern boundary of this land parcel and the character of its field pattern
Contribution to the gap between settlements:
Area to the west of SINC identified as important to the gap in 2008
This area contributes to the open character between the settlements

Historic links with the wider area if known:
Part of wider field pattern to the north
Ecological links with the wider area if known:
Not known
Recreational links with the wider area:
Rather isolated recreational area with limited footpath links
Emsworth DS
Trees and hedgerows bordering open spaces, which protect the rural nature of these areas and screen new development
Woodland, which provides a buffer to the urban environment
Maintenance and enhancement of boundaries between urban areas and these nature conservation areas.
Areas of Importance for Nature Conservation and associated wildlife corridors in and around Emsworth
Minimise the visual impact of buildings and the physical impact of increased access
The strengths and distinctive characteristics of Emsworth's settlement pattern including: variety of buildings and styles; sky brought right down into the
town by open spaces and water and relatively low building heights
Small scale "village atmosphere" with healthy mixture of residential, commercial and industrial use
Horndean Road: dating back to the late 19th century is the main route into Emsworth from the northwest, with views across arable farmland and
Horndean recreation ground. Architecturally valued Victorian and Edwardian houses are also aread along this road. There are a number of mature trees
close to the road frontage, which contribute to the ambience
Use of trees and hedges for screening new developments
Ose of thees and nedges for scheening new developments

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:
To the east - New Brighton LCA 23: Sub-urban housing area including some Edwardian villa housing along Horndean Road. In filled with later post war housing. Limited
recent housing development
Character of the urban edge:
Edwardian and more modern housing along Horndean road
Urban edge will change as UE13 is developed for housing
Relationship with adjacent settlement:
New Brighton extends into the western side of Horndean Road
Character of the wider landscape:
Very open arable landscape across land parcels 22.3.
Contrast with varied land cover, smaller fields and strong tree and hedgerow boundaries of land parcel 22.1
Relationship with adjacent wider countryside:
Strong landscape and visual links with 22.3
Divided from 22.1 by strong line of trees to northern boundary of this land parcel and the character of its field pattern
Contribution to the gap between settlements:
Part of the important landscape feature of the gap – it's very open and agricultural character but not visible from ridgeline
Visual exposure of the area leads to greater vulnerability to erosion
Historic links with the wider area if known:
Part of wider field pattern to the west and south
Ecological links with the wider area if known:
None
Recreational links with the wider area:
None

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:
Eastern edge of LCA 24 Emsworth historic core to the west: Historic medieval and post mediaeval core flanked by 20C suburban commercial development and
industrial complexes
Character of the urban edge at Emsworth:
Separated by dense tree cover (TPO)
Modern commercial medium scale development
Relationship with adjacent settlement:
Land parcel forms an important wetland lands cape setting to the urban form
Character of the wider landscape:
Adjacent landscape includes part of the River Ems and wetland and tree cover
Relationship with adjacent wider countryside:
Close links with adjacent landscape immediately to the west
Isolated from the wider landscape by urban settlement and the A27 and A259
Contribution to the gap between settlements:
Part of a very narrow gap between Emsworth in Havant Borough and Chichester District
Historic links with the wider area if known:
Part of the River Ems history of wetland and mills with millponds
Ecological links with the wider area if known:
SINC extends west of the land parcel
Recreational links with the wider area:
Part of Brook Meadow which provides local recreational opportunities
Emsworth DS
Minimise the visual impact of buildings
Buildings in scale within the context of the surrounding buildings and located where they will not overwhelm their surroundings
Retain woodland buffer to the urban form and enhance boundary between the two
Retain the rural and informal character of the open space
Encourage better habitat links and avoid fragmentation of landscapes

Relationship with the wider landscape/townscape

djacent settlement character and pattern:
lucleated historic core of Langstone to the south, with modern expansions to the north west
haracter of the urban edge:
ree belt along footpath / cycleway to north west forms well-vegetated edge to the modern housing developments to the north west of land parcel
elationship with adjacent settlement:
ontained on the north, western and southern edges by Langstone
haracter of the wider landscape:
andscape to the east is parkland (Wade Court), with rural landscape to the east of that
elationship with adjacent wider countryside:
and parcel is separated from the wider landscape by Wade Court to the east
contribution to the gap between settlements:
lot critical to the perception of the separation of Emsworth and Havant as it is not widely visible and is not located between the 2 settlements. The open land may b
nportant in separating the old part of Langstone from the newer part to the north, and in separating Langstone and Emsworth.

Historic links with the wider area if known:

None known

Ecological links with the wider area if known: None known

Recreational links with the wider area:

Footpaths link with regional footpaths and national cycle paths

VDS/Parish Plan/Conservation Area Appraisal – relevant extracts:

Langstone VDS currently in progress; relevant aspects from Langstone Conservation Area Appraisal: The open land to the north of the Langstone CA forms the rural backdrop setting for the conservation area. Trees (including those around the boundaries of 26.1, within the garden of 59-61 Langstone Road - within Wade Court CA) form an important backdrop to and are important to the setting of the conservation area.

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Nucleated core of Langstone to the south west, with modern expansions to the north west and modern parts of southern Havant to the north (separated by the A27)

Character of the urban edge:

The older part of Langstone separated by woodland; tree belt along footpath / cycleway to north west forms well-vegetated edge to the modern housing developments to the north west of land parcel; highways vegetation creates a soft northern edge

Relationship with adjacent settlement:

Contained on the north by the A27 with Havant beyond; the north western edge by modern parts of Langstone; historic part of Langstone separated by 26.1

Character of the wider landscape:

Rural landscape to the east, harbour basin to the south

Relationship with adjacent wider countryside:

Eastern part of the parcel links to the wider landscape to the east, southern edge relates to the open water of the harbour

Contribution to the gap between settlements:

Not critical in the perception of the separation of Emsworth and Havant as it is not located between the 2 settlements. The open land in the eastern part of the parcel is important in separating Langstone and Emsworth.

Historic links with the wider area if known:

None known

Ecological links with the wider area if known:

None known

Recreational links with the wider area:

Footpaths link with regional footpaths and national cycle paths

VDS/Parish Plan/Conservation Area Appraisal - relevant extracts:

Langstone VDS currently in progress; relevant aspects from Wade Court Conservation Area Appraisal and Langstone Conservation Area Appraisal: Trees (including those within Wade Court CA) form an important backdrop to and are important to the setting of the Langstone Conservation Area. The trees also contribute significantly to the rural appearance of the land bordering Chichester Harbour.

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

The modern parts of southern Havant are closest to the north (separated by the A27); the nucleated core of Langstone is to the south west, with north Langstone modern expansions to the west (both separated by Ica 26.1 and 26.2); the modern western edge of Emsworth is to the east, separated by Ica 26.4

Character of the urban edge:

To the north the A27 highways vegetation creates a soft northern edge; the other nearby settlements are separated by open and wooded landscape and only the historic Langstone sea front is visible to the south west, set within a wooded backdrop.

Relationship with adjacent settlement:

Contained on the north by the A27 with Havant beyond; open countryside separates Langstone and Emsworth

Character of the wider landscape:

Rural / parkland landscape to the west; rural landscape to the east, harbour basin to the south

Relationship with adjacent wider countryside:

Western part of the parcel links to the adjacent landscape to the west; the central core of Warblington is self-contained; the north eastern part relates to the countryside to the east; as a whole the land parcel forms an important part of the open countryside between Langstone and Emsworth and south of Havant; the southern edge relates to the open water of the harbour

Contribution to the gap between settlements:

The northern section is part of the narrow separation of Emsworth and Havant – evident from the A259; The open land in the southern part of the parcel is important in separating Langstone and Emsworth.

Historic links with the wider area if known:

None known

Ecological links with the wider area if known:

None known

Recreational links with the wider area:

Footpaths link with regional footpaths and national cycle paths

VDS/Parish Plan/Conservation Area Appraisal - relevant extracts:

Emsworth Design Statement relevant extracts;

- The open space surrounding Emsworth is fundamental to the identity and character of the settlement, giving a strong sense of place and contributing to the quality of life.
- To the west, open countryside mainly consisting of large open fields of arable farmland with few hedgerows, provides a clear separation from the larger urban area of Havant;
- The old Church Path provides a dramatic view of Warblington Castle

Warblington Conservation Area Appraisal relevant extracts;

- The Conservation Area is part of the open area of countryside bordering this stretch of Hampshire coastline separating the built-up areas of Havant and Emsworth.
- The hedged fields associated with the hinterland of many harbourside villages that were used for grazing working animals are characteristic of the Conservation Area.
- There are a number of significant yews within the churchyard and Warblington Castle Farmhouse and the Old Rectory have substantial tree planting within their grounds. Trees are also a significant feature in hedgerows along Pook Lane, although they are notably lacking in the filed hedgerows to the west of the area. While they are a feature of the hedgerows to the east, here the hedgerows themselves weak in places and need reinforcing. Trees provide a backdrop to most internal views with the Conservation Area.
- To the south west the land slopes gently down to the water with no sea wall hedgerow or woodland fringe separating the meadows from the foreshore. This open boundary is highly visible when viewed from Hayling Island and the harbour itself, although the hedgerow trees and tree groups further inland give an impression of woodland.
- There are significant views across Chichester Harbour from the footpath and from the whole of the foreshore bordering the southern boundary of the Conservation Area.
- Long views across the western meadows where distant hedgerow trees and tree groups provide a woodland backdrop.

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

The modern parts of north western Emsworth contain the northern fields to the east; the historic core of Emsworth is some 800m away to the east; the southern part of Havant is to the north west, separated by the A27

Character of the urban edge:

The edge of Emsworth is open in parts; to the north the A27 highways vegetation creates a soft northern edge

Relationship with adjacent settlement:

Contained on the north east by Emsworth and on the north by the A27 with Havant beyond to the north west;

Character of the wider landscape:

Rural landscape to the south, east and west, and to the north (separated by the A27 and the railway line)

Relationship with adjacent wider countryside:

The site is part of the open countryside between Havant and the coast

Contribution to the gap between settlements:

The northern section forms most of the narrow separation of Emsworth and Havant and is visible from the A259; the open land in the southern part of the parcel is important in separating Langstone and Emsworth.

VDS/Parish Plan/Conservation Area Appraisal – relevant extracts:

Emsworth Design Statement relevant extracts;

- The open space surrounding Emsworth is fundamental to the identity and character of the settlement, giving a strong sense of place and contributing to the quality of life.
- To the west, open countryside mainly consisting of large open fields of arable farmland with few hedgerows, provides a clear separation from the larger urban area of Havant;
- In some areas strips of countryside bordering the road could be enhanced to better define the countryside, including areas around and east of Warblington roundabout
- The old Church Path provides a dramatic view of Warblington Castle
- Warblington Conservation Area Appraisal relevant extracts;
 - The Conservation Area is part of the open area of countryside bordering this stretch of Hampshire coastline separating the built-up areas of Havant and Emsworth.
 - The hedged fields associated with the hinterland of many harbourside villages that were used for grazing working animals are characteristic of the Conservation Area.
 - Trees are a feature of the hedgerows to the east, here the hedgerows themselves weak in places and need reinforcing. Trees provide a backdrop to most internal views with the Conservation Area.

HAVANT OPEN LANDSCAPE CAPACITY STUDY 2015 RECORD SHEET

Land parcel:	26.5
County landscape character area (HCC):	Havant and Emsworth Coastal Plain (landscape type: Coastal Plain Open)
District Landscape character area / landscape type:	LAC26 Warblington and Wade Court / LCTH Open Lower Harbour Plain
Presence in Chichester Harbour AONB	Yes
Local Gap (ref Policy CSII.9)	Yes – part of open space between Emsworth and Havant
Date of land parcel survey:	13.3.14
Surveyors:	AG / IDT
Weather/visibility:	Sunny, hazy

VISUAL SENSITIVITY

Landscape sensitivity score:		
Medium/ High		

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:
Modern western parts of Emsworth to the north east; the historic core of Emsworth is some 800m away to the east
Character of the urban edge:
The south western edge of Emsworth is partly vegetated
Relationship with adjacent settlement:
Eastern edge of parcel is adjacent to Emsworth; the majority of the site has no physical connection with Emsworth
Character of the wider landscape:
Rural landscape to the north and west, harbour to the south
Relationship with adjacent wider countryside:
The site is part of the open countryside between Emsworth and Havant, Emsworth and Warblington

Contribution to the gap between settlements:

The parcel is important in separating Emsworth and Warblington (and Langstone beyond), and has some importance in separating Emsworth from Havant (particularly when walking the footpaths and when viewed from the harbour).

Historic links with the wider area if known:

None known

Ecological links with the wider area if known: None known

Recreational links with the wider area:

Footpaths link with regional footpaths

VDS/Parish Plan/Conservation Area Appraisal - relevant extracts:

Emsworth Design Statement relevant extracts;

- The wooded shoreline at Nore Barn Woods is a characteristic feature of the shoreline around Chichester Harbour. Although not designated as ancient woodland, it has 8 ancient woodland indicators.
- The open space surrounding Emsworth is fundamental to the identity and character of the settlement, giving a strong sense of place and contributing to the quality of life.
- To the west, open countryside mainly consisting of large open fields of arable farmland with few hedgerows, provides a clear separation from the larger urban area of Havant;
- The old Church Path provides a dramatic view of Warblington Castle

Warblington Conservation Area Appraisal relevant extracts;

- The Conservation Area is part of the open area of countryside bordering this stretch of Hampshire coastline separating the built-up areas of Havant and Emsworth.
- The hedged fields associated with the hinterland of many harbourside villages that were used for grazing working animals are characteristic of the Conservation Area.
- Trees are a feature of the hedgerows to the east, here the hedgerows themselves weak in places and need reinforcing. Trees provide a backdrop to most internal views with the Conservation Area.

BAP/Phase I records: Brook Farm (supports more than one species)		

Natural factors	Cultural factors	Perceptual features
Presence of SSSI/SINC/local wildlife designation/Semi-Natural Ancient Woodland: Large field comprising the eastern part of site is Brook Farm SINC – open field; Langstone Harbour SSSI, Chichester and Langstone Harbours SPA, Chichester and Langstone Ramsar, Solent Maritime SAC 100-200m from the southern boundary		
Presence in a floodplain: The eastern side, centre and south western corner of the land parcel is within flood zones 2 and 3		
Sensitivity score: Medium / High	Sensitivity score: Low	Sensitivity score: Medium
Landscape sensitivity score: Medium	1	1

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

The modern parts of western and north western Emsworth contain the site to the east and north; the historic core of Emsworth is some 800m away to the east

Character of the urban edge:

The western edge of Emsworth is open, with little vegetation; the highways vegetation along the A259 creates a soft northern edge

Relationship with adjacent settlement:

Contained on the east and north by Emsworth

Character of the wider landscape:

Rural landscape to the west and to the south with the harbour beyond

Relationship with adjacent wider countryside:

The site is part of the open countryside between Havant and the coast and between Emsworth and Havant and Emsworth and Langstone

Contribution to the gap between settlements:

The northern section forms part of the narrow separation of Emsworth and Havant and is visible from the A259; the open land in the southern part of the parcel is important in separating Langstone and Emsworth.

Historic links with the wider area if known:

Old Roman Road (A259)

Ecological links with the wider area if known: None known

Recreational links with the wider area:

Footpaths link with regional footpaths

VDS/Parish Plan/Conservation Area Appraisal – relevant extracts:

Emsworth Design Statement relevant extracts;

- The open space surrounding Emsworth is fundamental to the identity and character of the settlement, giving a strong sense of place and contributing to the quality of life.
- To the west, open countryside mainly consisting of large open fields of arable farmland with few hedgerows, provides a clear separation from the larger urban area of Havant;
- In some areas strips of countryside bordering the road could be enhanced to better define the countryside, including areas around and east of Warblington roundabout
- The old Church Path provides a dramatic view of Warblington Castle

Traditional linear settlement with indented edges to the west
Character f the urban edge:
Largely softened by vegetation but exposed in parts
Indented edge
Relationship with adjacent settlement:
Forms the open landscape setting linking to the coast
Sharp contrast between settlement and landscape
Character of the wider landscape:
Coastal marshes around the coast to the north and south
Small scale pasture around villages to the north and south
Large scale open arable landscape to the west link south of North Hayling
Relationship with adjacent wider countryside:
Part of continuity of coastal landscape
Contrast with small scale pasture
Separated form land parcel 29.4 by the village, and tree cover and small field of pasture on St Peter's Road
Contribution to the gap between settlements:
N/A
Historic links with the wider area if known:
Not known
Ecological links with the wider area if known:
Part of the coastal habitat matrix
Recreational links with the wider area:
None

VDS/Parish Plan – relevant extracts:

Northney Tye VDS Design Considerations:

- The open characteristics of the settlement edges with views of agricultural land and the harbour environs.
- The key feature is the open character of land, hedgerows.
- Potential impoverishment of natural resources. Planting hedgerows with native species will protect natural biodiversity
- The importance of future farming practices to the rural character of the area
- Although new development may only be relatively small, its impact on the ecological resource and its connectivity may break up the existing habitat mosaic

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:
Traditional linear settlement with indented settlement edge to east
Modern nucleated village to west
Scattered settlement to north
Character of the urban edge:
Well vegetated edge to North Hayling
Exposed edge to Stoke Common

Relationship with adjacent settlement:

Forms open setting with a strong contrast with both settlements

Character of the wider landscape:

Smaller fields surrounding settlement

Relationship with adjacent wider countryside:

Strong contrast with wider landscape character but part of the continuity of rural landscape which runs between settlements up to the coastal edge

Contribution to the gap between settlements:

Important to maintaining the separate identity of Stoke Common and North Hayling

Historic links with the wider area if known:

Important site for Roman settlement in the area

Ecological links with the wider area if known:

No

Recreational links with the wider area:

Part of footpath network through the rural hinterland of north Hayling Island

VDS/Parish Plan – relevant extracts:

Relationship with the wider landscape/townscape

A liscout asttle yearst shows stay and nottenny
Adjacent settlement character and pattern:
Stoke Common: Linear village expanded through modern development
Stoke and Fleet: linear settlements with intermittent ribbon development, now largely suburban in character
Stoke Common blends into Stoke with high intervisibility between the settlements
Fleet appears more distinct
Character of the urban edge:
Well vegetated edge to Stoke Common
Short gardens with hedges to Stoke
Longer gardens with varied edge of hedges, some trees and open boundaries
Relationship with adjacent settlement:
Eastern edge has a close relationship with the string of settlements and the open land forms part of the small gaps in the ribbon development
Stoke Common is separated by dense tree cover from the village
Coastal edge feels distinct from the village
Open farmland in the south separates coastal landscape from built form of the settlements
Character of the wider landscape:
Narrow continuous coastal landscape of along Langstone Harbour
Pattern of arable and pasture extends south towards Newtown
Relationship with adjacent wider countryside:
Western coastal edge an important part of Langstone Harbour landscape
Strong landscape and visual relationship between land north and south of Daws Lane since orchards north of Daws Lane were removed and ploughed up
Field pattern around settlements are locally distinctive
Contribution to the gap between settlements:
Land forms part of the open area between Stoke Common and Stoke and between Stoke and Fleet (land parcel 30.2 also plays a role)
Lack of continuity of open land between Stoke Common and Stoke due to high level of intervisibility and modern expansion
Historic links with the wider area if known:
A surviving area of Stoke Common (west if the village) reflects the former unenclosed coastal fringe
Hedgerows reinforce historic field patterns
Ecological links with the wider area if known:
Part of the SSSI, SAC and Ramsar of Langstone Harbour coastal margins
Recreational links with the wider area:
Hayling Billy continues to south and north
VDS/Parish Plan – relevant extracts:

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Post-war housing at Gable Head to south

Character of the urban edge:

Largely well vegetated

Relationship with adjacent settlement:

Small boundary in south eastern section adjacent to the settlement edge, with the north east corner near to Fleet and scattered development along A3023 to eastern boundary

Character of the wider landscape:

Flat farmland to north and west; coastal edge to east

Relationship with adjacent wider countryside:

North part has a strong relationship with the farmland to the west and north; southern part not linked to wider landscape

Contribution to the gap between settlements:

North part of parcel forms an important part (with 31.1) of the open farmland between Newtown and the small / linear hamlets of Fleet and Stoke to the north

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Early/mid 20C grid pattern of Farlington to north and west. Separated from Bedhampton to east by A3 intersection

Character of the urban edge:

1930s housing facing into parcel from elevated position. Westways back on to parcel with mix of garden boundary treatments, but generally open edges. Wooded A3 corridor separates parcel from Bedhampton

Relationship with adjacent settlement:

North western field links well with housing to west

Character of the wider landscape:

Low-lying marshland / grazing meadow / intertidal mud flats

Relationship with adjacent wider countryside:

South west corner links into Farlington Marshes albeit separated by A27.

Contribution to the gap between settlements:

Important open land between Farlington and Bedhampton which is evident in elevated views from the high ground to the north and when travelling east / west between the settlements. The open gap north of Havant Road (in LCA 12) is very narrow, making the open land of 14.1 more critical in maintaining the settlement separation.

Historic links with the wider area if known:

None known

Ecological links with the wider area if known:

Area south of railway connects with wider coastal areas of ecological value and to A3 and railway corridors

Recreational links with the wider area:

None noticeable

VDS/Parish Plan – relevant extracts:

None found

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Brockhampton industrial park to east with gravel extraction, sewage treatment works, haulage etc. To the north, Bedhampton separated by employment allocation, A27 corridor and open ground of LCA13

Character of the urban edge:

Brockhampton industrial park is somewhat harsh although some tree planting and scrub.

Relationship with adjacent settlement:

Isolated from other residential areas; separated from industrial park by Hermitage Stream corridor, although gravel working visible from east of area.

Character of the wider landscape:

Inter-tidal mudflats and estuary to south

Relationship with adjacent wider countryside:

Transitional landscape between land and seascape and well-connected with seascape but disconnected to vestigial countryside to north due to A27

Contribution to the gap between settlements:

Forms part of gap between Brockhampton Industrial Estate and Bedhampton/ Farlington, evident when travelling along A27 and A3, and when viewed from the open water

Historic links with the wider area if known:

None known

Ecological links with the wider area if known: Hermitage Stream; shoreline of SSSI and Ramsar

Recreational links with the wider area:

Linked by footpaths to Bedhampton and to Wayfarers Walk

VDS/Parish Plan – relevant extracts:

None

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Industrial estate to north, Langstone to east

Character of the urban edge:

Largely well wooded, though industrial units are partly visible

Relationship with adjacent settlement:

Contained to north by industrial park and sewage works, distant from residential areas, except low density housing in Langstone / Mill Lane to eastern boundary

Character of the wider landscape:

Foreshore, mudflats and seascape.

Relationship with adjacent wider countryside:

Visual links with Broadmarsh to the west. Strongly linked to seascape

Contribution to the gap between settlements:

Area acts as a buffer between the industrial estate at Brockhampton and the foreshore/SSSI/RAMSAR of Langstone Harbour and between the industrial estate and Langstone

Historic links with the wider area if known:

Not known

Ecological links with the wider area if known:

Hermitage Stream

Recreational links with the wider area:

Solent Way connects with wider footpath network and Wayfarers Walk

VDS/Parish Plan – relevant extracts:

VDS for Langstone in preparation. Mill Lane Conservation Area appraisal – designation aims to protect the open, historic landscape adjacent to the harbour; Mill Lane itself retains the character of a rural lane; the trees (many of which are the subject of TPOs) within spacious gardens contribute to the rural character, including in views from the harbour.

Relationship with the wider landscape/townscape

Adjacent settlement character and pattern:

Nucleated historic core of Mill Road / Langstone to the south and south east, with modern expansions to the north and north east, industrial to the north west, large, detached houses along leafy Langstone Road to the east

Character of the urban edge:

Open to south - brick wall with conservation area houses beyond, partly open to north, largely wooded to east, beyond the Langstone Road

Relationship with adjacent settlement:

Surrounded on 3 sides by residential settlement. The western part of Mill Lane Conservation Area is adjacent to the southern boundary

Character of the wider landscape:

Wooded stream valley to west, salt marsh beyond; small scale, enclosed fields within the AONB north of the eastern part of Mill Lane CA (east of Langstone Road)

Relationship with adjacent wider countryside:

Disconnected by woodland belt and stream to west, minimal link with AONB landscape to east which forms the setting for the eastern part of Mill Lane Conservation Area

Contribution to the gap between settlements:

Not critical to the perception of the separation of Emsworth and Havant as it is not widely visible and is not located between the 2 settlements. The open land forms a separation between the old part of Langstone and the newer part to the north. Helps establish change of character from more built-up Havant to village of Langstone, and provides an open approach to and setting for the older part of Langstone to the south.

Historic links with the wider area if known:

None known

Ecological links with the wider area if known: None known

Recreational links with the wider area:

Cycle path opposite links with national cycle path network

VDS/Parish Plan – relevant extracts:
