

Hampshire Farm, Emsworth Replacement footbridges project

Work Commencing: SEPTEMBER 2026

Work Duration: 4 WEEKS

Havant Borough Council will be replacing 3 no. failing timber bridges at Hampshire Farm Meadows. The existing bridges are at end of life and are essential for access to the open space and must be replaced. The proposed bridges are made using recycled glass reinforced plastic and have a design life of over 75 years with excellent slip resistance for the safety of residents. The bridges are made using a unique natural deck finish which blends into the natural environment.

Thank you for your patience while the works are being done.
