HAVANT BOROUGH COUNCIL
5 AUG 2026
RECEIVED

Dear Sirs

Re.: BUILDING APPLICATION EM08A, The Horsefield

I wish to lodge my huge dissatisfaction that the above site is under consideration for housing development.

This land lies inside the Chichester Harbour National Landscape which should never be used for the purposes of major development unless there are exceptional circumstances involved, and in this instance there most certainly are not.

It seems that Havant Borough Council has rewritten Policy 30 of the Chichester Harbour National Landscape to suit its own needs. Where would we be if our government altered the rules to implement changes they wanted to force on the general public?!

I chose to live in this area because of its outstanding natural beauty. [redacted] We already have big concerns over the water quality in the harbour. It sometimes seems there is an evil force at large, determined to spoil the lifestyle and health of the many law-abiding citizens.

If the building of 90 houses is allowed to happen, not only will it increase the volume of traffic on the A259 and further burden our sewerage system, but it sets a precedent for future building in protected areas.

There are so many derelict buildings in the area which should be the focus of redevelopment before losing more of our green belt.

Please do what you know to be right.

Yours faithfully

[redacted]

Anne Cole (Mrs)
