

# Census Statistics 2011

On 27th March 2011 each household filled out a copy of the census. This data provides the baseline data for research, policy and funding for the next decade.

## NUMBERS

## FUTURE

The increase in people aged 60-69 since 2001. By 2021, there will be more people of retirement age than of school age for the first time.

The increase in the number of homes forecast to be built in the next 10 years.

The percentage of people estimated to be living in one person households by 2026 across Hampshire.

The estimated increase in the number of people living in Havant Borough by 2021 if new developments go ahead

In the last decade Havant Borough has seen a wide variety of changes that largely reflect the trends of the wider national population. More people are getting older and the more people are getting older and the average life expectancy is increasing while birth rates are only just increasing after a decade of decline.

## IMPACT

- Housing:** 7-8% reduction in people owning a home with a mortgage still being paid in the past decade. 0.6% change in the number of people in social rented housing.
- Religion:** 59.2% Christian, down from 73.5% in 2001 Those with no religion increased from 17.4% in 2001 to 32.3% in 2011.
